Email: karanamsubbarao@gmail.com

Mobile: 9880124064

Product Evangelist | Product Owner | Architect | Hands on Developer | Mentor | Teacher

Innovative and results-driven technology leader with 25 years of experience building products and platforms, from garage-based startups to large enterprises. Expertise in developing scalable data platforms using cloud-native technologies, Big Data, and microservices. A proven track record of bootstrapping platforms and teams, having been the first member of three successful teams.

Certified Cloudera Trainer in Big Data technologies, including Apache Spark and Hadoop, with deep expertise in handling large-scale cloud transformation programs and implementing Data Mesh architectures. Strong foundation in data pipelines, machine learning models, deep learning methods, probability theory, LLM and statistical analysis, complemented by training from Indian Statistical Institute and Indian Institute of Science Bangalore, Adept at designing and executing cutting-edge data solutions that drive business growth and operational excellence and create impact

Professional Experience Details

Student and Freelance Trainer (June 2024- Till Date)

Career Break for Medical reasons to take care of old age Mother.

As part of this career break, I'm conducting trainings on AWS, Databricks, Advanced Java. Kubernetes etc Learning and doing research on Classic ML, Deep Learning Models, Large Language Models and Generative AI and working on research ideas and also completed following courses from CCE IISc Bangalore

1. Mathematical Foundations of Generative AI
2. LLMs And Applications

Following ML Projects are executed as part of the course

MorningBrief: Your AI Chief of Staff for email and Calendar

- Developed Python Application that reads your email and calendar and produces a personalized briefing. What truly needs your attention today, what can wait, what to ignore. Application classifies every message into Action Required/FYI/Noise with one-line reason, summarizes long threads, detect emails where you are bottleneck

Generate SQL for Business Analysts

- As part of Generative AI Project, developed a Python Application which can generate SQL for a database for a given schema. This will help business analysts

Drools Rule Generation through Generative AI

- As part of Generative AI Project, developed a Generative AI Python Application which can generate drools rules

JP Morgan Services India Pvt Ltd | June 2016 - May 2024

Executive Director | Jan 2020 - May 2024

Vice President | June- 2016 - Jan 2020

Senior Technology Leader | Data Cloud Architecture | Platform Engineering

- Bootstrapped Corporate Technology Architecture Group and Shared Services Group in Bangalore as first employee of the Corporate Technology Architecture and grew the team to 10 people
- Lead of Architecture Council for reviewing Architecture of various groups
- Build Global Partnership across multiple offices in J P Morgan
- Played multiple strategic and technical roles, including Developer, Technical Lead, Engineering Manager, Product Owner, and Product Evangelist.
- Bootstrapped the Corporate Technology Architecture Group and Shared Services Group in Bangalore as the first employee, scaling the team to 10+ members.

JPMC Data Migration Service:

Business Case:

Develop a SOX Compliant/PCI DSS Compliant Service for enabling Application teams to migrate data from Hadoop to Public Cloud

- Designed and Developed Federated Data Migration Service to migrate the data from on premises to AWS for migrating data for Enterprise Applications in JPMorgan leveraging latest technologies such as Spring boot, Apache Spark
- Developed Metrics Portal for Data Migration Services by parsing S3 Access Logs from Splunk for Enterprise wide usage by CIOs

Data Distribution Service:

Business Case:

Develop a SOX Compliant/PCI DSS Compliant Platform for Data Market Place for producers to publish and consumers to consume the data.

Solution:

- Data Services Platform is Data Distribution Platform with the aim of creating Data Market Place for Publishers and Consumers. Data distribution was also helping to solve data lineage
- Data Services Platform is self-serviceable platform for Applications to publish/consume data and is built on Kafka, Micro services, Cloud Framework

Data Retention and Destruction Service:

Business Case:

Develop a SOX Compliant/PCI DSS Compliant Platform for retention and destruction of data from various data sources

Solution:

- Data Retention and Destruction Services Platform is self-serviceable Platform for Applications to archive cold data from RDBMS, Files, HDFS to S3 for on premises applications
- Archive Services Platform enables cost savings to customers
- Archive Services Platform is Cloud Native Application running in CloudFoundry, AWS Java SDK
- Data Retention and Destruction Service was adopted firmwide as the centralized Archive Platform under the Centralized Record Management Program (CRMP), generating \$15 million in cost savings over three years.

Xebia IT Architects, Bangalore | April 2015- May 2016

Director

CLOUDERA CERTIFIED INSTRUCTOR & BIG DATA , BI EVANGELIST

- Cloudera Certified Instructor for Big Data technologies, specializing in Apache Spark, Hadoop, Pig, Hive, Impala, and Statistical Modeling for Large Datasets.
- Evangelized Big Data technologies through hiring, training, pre-sales, and solution architecture, playing a key role in talent acquisition and skill development.
- Trained multiple professionals in Big Data and analytics, driving enterprise adoption and expertise in large-scale data processing.
- Led the Big Data & BI Division in Bangalore, spearheading innovation and strategic growth.
- Developed Dockerized Apache Storm for simplified deployment and scalability
(<https://hub.docker.com/r/karanamsubbarao/>)

Client: PubMatic, Pune (June 2015 – Present)

Big Data Lead | Data Pipeline Architect

PubMatic's platform processes over 1.5 trillion transactions globally per month, handling 20TB of data daily to generate performance reports and business insights for internal and external customers.

Key Contributions:

- Developed an Ingestion Pipeline using Kafka into HDFS (Hadoop Cluster) for seamless data processing.
- Designed and implemented data transformation and processing workflows using MapReduce, Hive, and Pig Scripts.
- Built efficient querying and analysis solutions leveraging Hive and visualization tools for actionable insights.
- Led a team responsible for production support of legacy applications, ensuring stability and performance.
- Managed end-to-end design, development, code review, production support, and deployment activities, driving operational efficiency.

Goldman Sachs Services India Pvt Ltd | December 2009 – March 2015

Vice President

Technical Specialist | Technology Leader | Big Data & Application Architecture

- Bootstrapped the Application Practices Group in Bangalore as the first employee, scaling the team to 30+ members over five years.
- Established global partnerships across multiple Goldman Sachs offices, fostering cross-functional collaboration.
- Evangelized the Conductor CSF Platform in the APAC region, driving business unit adoption and expanding platform usage.
- Led proof-of-concept development for large-scale data processing using Hadoop, MapReduce, and other Big Data technologies.
- Contributed to the platform's growth to 3,000+ users and 2,000 onboarded products.
- Recipient of the BU Innovation Award for CSF Onboard Automation, recognizing impact on operational efficiency.

Technical Contributions:

- Influenced major architectural decisions, improving platform performance and scalability.
- Led key module development, including SSO, Portal, and Atlassian tools.
- Implemented Apache HAProxy for high availability, ensuring system reliability.
- Served as a mentor to junior team members, guiding technical and career development.

Agilent Technologies, Bangalore | Oct 2007 – Oct 2009
Technology Lead | Analytics & Customer Experience

- Conceptualized, designed, and developed a 45-day training course for campus recruits, enhancing onboarding and skill development.
- Introduced ThoughtWorks Mingle as an Agile Project Management Tool, streamlining project tracking and collaboration.
- Filed the first Invention Disclosure from Agilent's Bangalore center for measuring voice and data in-call parameters, contributing to technological innovation.

Technical Contributions:

- Developed the Customer Experience Manager (CEM) Platform, enabling advanced measurement of mobile user experience.
- Led product development for measuring KPIs for inbound and outbound roamers, providing critical insights for cellular companies

Wyse Technology (Acquired by Dell) Bangalore India | Aug 2005- Sep 2007

- Product Development for Device management solution for thin clients

Kuberre Systems Andover MA | April 2003- April 2005

- Product Development for VIDE which is IDE for Factset Vision
- Developed a Portal for Investment professionals

Narad Networks (Acquired by Ciena) Westford MA | April 2001- March 2003

- Network Management and Service management Solution for Cable and broadband HFC networks

Lucent Technologies Westford MA | Dec 1999-March 2001

- Network Management and Service management Solution for ATM and Frame relay switches

Rothwell Systems/HCL Perot Systems | Jan 1996-Dec 1999

- Smalltalk Consulting and custom software development for customers in US, UK, Japan
